

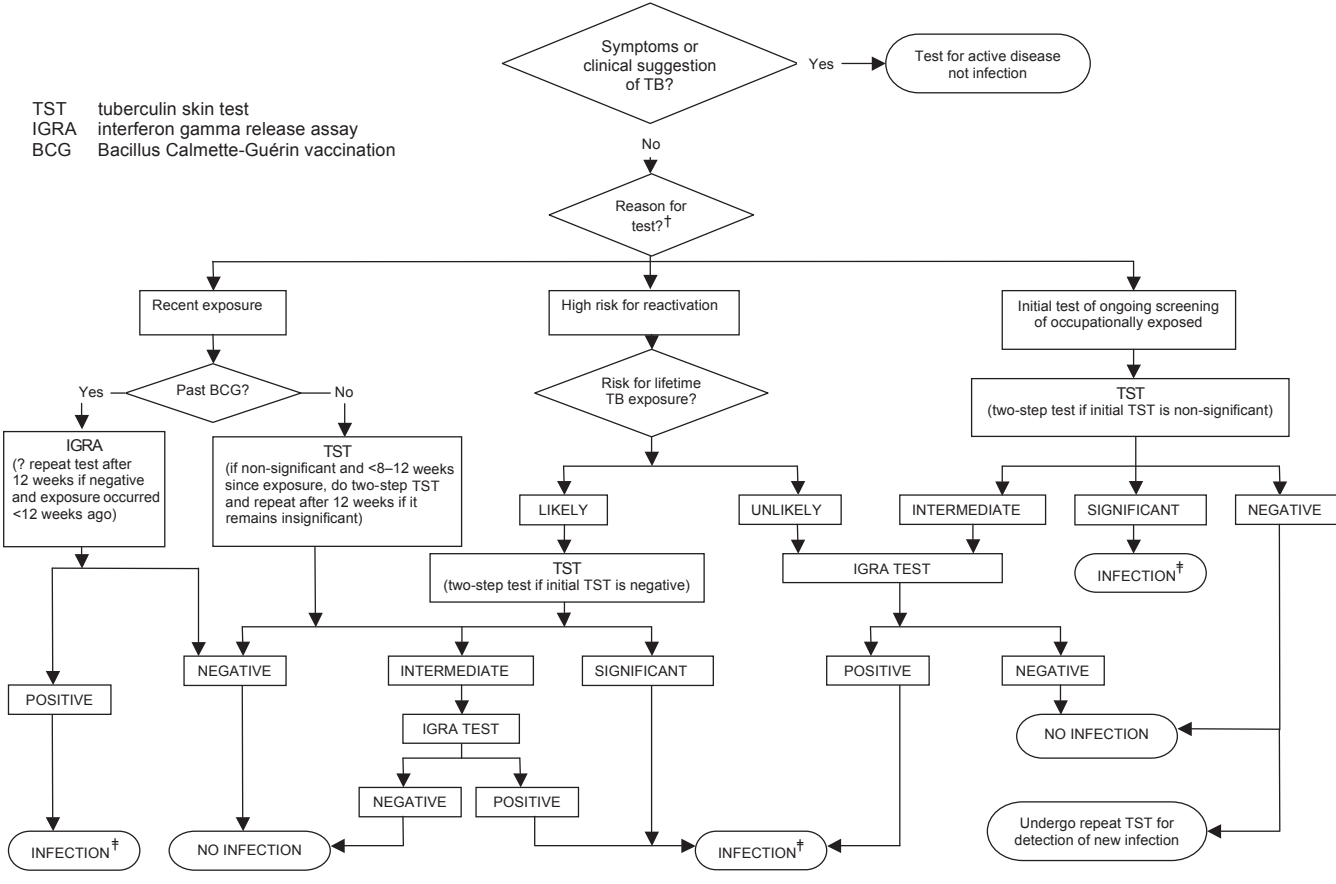

Fig. 5

Suggested screening for latent tuberculosis*

(Aust Prescr 2010;33:12-18)

TST tuberculin skin test
 IGRA interferon gamma release assay
 BCG Bacillus Calmette-Guérin vaccination

* Proposed approach suggested by the author. Note: this has not been validated.

† If significant immunosuppression, consult with clinician experienced with TB screening

‡ Perform chest X-ray and clinical assessment to exclude active TB before diagnosing infection as latent
